

McKenzie Explorer Adventure

When our adventure started, so did the rain.

Day one was over very wet terrain

Drama began when the track turned greasy

We were tailend, the going wasn't easy

Wheels!! Kept spinning we weren't winning

Along came Cliff, he had us moving in a jiff

Some routes on this McKenzie explorer adventure

Raised a few heartbeats, 'tis a miracle we still have dentures

The scenery was spectacular wherever we went

We learned McKenzie had a dog which he sent

To round up sheep on his neighbours farms

A man lacking morals and without any qualms

This infamous man was Not! Without brains

He knew how to make monetary gains

By hiding the sheep, for quite some while

Then selling them to neighbours until caught he stood trial!!

We traversed many ranges & crossed rivers wide

Followed instructions, from our trusted guides

The Godley & MaCauley valleys are a must to see

With mighty river crossings & stunning scenery

Well!! When Murray awoke, his new number plate read

'HOG I' attached as well a large rams head

While most folk slept, several were having fun

'HOG I' & rams head stayed put, a job well done!!

We gathered huge mushrooms along the way

Had them for breakfast very next day

Their were overlaps on this safari we'd done before

And just as interesting you always learn more

People do these safaris from all walks of life

This being our 4th & free from strife

So!! Our sincere 'THANKS' to Malcolm & his great crew

For the memorable adventures and sadly we bid you Adieu!!
